Experience

Full Stack Software Development Student   August 2018 - January 2019

Prime Digital Academy, Minneapolis, MN

- Solo Project: Cater   November 2018 - December 2018
  - Working in restaurants I saw a disconnect between customers and the people who make their food, the Chefs.
  - This project cuts out the restaurant and brings the Chef to the customer.
  - A customer creates an account, logs in, is able to select the Chef they desire. They can see the chefs menu, select what they would like the Chef to cook, set the date they want it cooked and then checkout with Stripe.
  - Technology used was React, Node, Express, Javascript, Redux, Redux Sagas, PostgresQL, Material UI, moment.js and Stripe API for payments.
- Group Project: Start date 12/10/18

Saute Chef   June 2017 - June 2018

Altius, Pittsburgh, PA

- Prepared Saute dishes for one of Pittsburgh's highest rated restaurants consistently with a focus on quality and presentation.
  - Fast paced, high intensity environment.
  - Provided input and feedback on new menus and plate presentation.
  - Communicated with a group of passionate workers providing a world class experience for all guests.
  - Started as as a pastry chef then moved up to the pantry position before being promoted to Saute.
